

KUNDAN D R

AI & Machine Learning Engineering Student

Mysuru, Karnataka, India — +91 7019934034 — kundandr05@gmail.com

Portfolio — LinkedIn — GitHub

Professional Summary

AI & Machine Learning Engineering student with hands-on experience in Agentic AI, multimodal AI assistants, full-stack development, backend development, and REST API integration using Python, FastAPI, React, and Next.js. Published research author with an IJCRT publication and two independently published Amazon KDP books. Experienced in hackathon-driven software development, LLM integration, database development, rapid prototyping, and building production-oriented applications. Incoming incubation intern at WizzyBox.

Education

Maharaja Institute of Technology, Mysuru

Bachelor of Engineering (B.E.) in Computer Science & Engineering (AI & ML)

Expected Graduation: 2027

Mysuru, Karnataka

Sri Adichunchanagiri Independent PU College

Pre-University Course (PCMB)

2023

Karnataka

BGS Central School, Bhadravathi

Secondary School Leaving Certificate (SSLC)

2021

Karnataka

Technical Skills

- **Programming Languages:** Python, JavaScript, TypeScript, Java, C, HTML, CSS
- **AI & Machine Learning:** Agentic AI, Multi-Agent Systems, LLM Integration, RAG, Prompt Engineering, Machine Learning, Deep Learning, Sentiment Analysis
- **LLM Technologies:** Gemini, OpenAI, Perplexity, OpenRouter API, Ollama
- **Web Development:** React.js, Next.js, Node.js, Tailwind CSS, Streamlit, Responsive Web Development
- **Backend Development:** FastAPI, REST APIs, API Integration, Backend Architecture
- **Databases:** SQL, SQLite, SQLite Cloud, Firebase
- **Cloud & Deployment:** Firebase Authentication, AWS Foundations, Microsoft Azure Basics, Render, Vercel
- **Tools & Engineering:** Git, GitHub, System Architecture, Software Development, Problem Solving, Rapid Prototyping

Experience

WizzyBox Private Limited

Incoming Incubation Intern, WizzyBox Career Accelerator Program (WCAP)

Sep 2026 – Nov 2026

Bengaluru, Karnataka

- Selected for the WizzyBox Career Accelerator Program (WCAP), delivered by WizzyBox in partnership with NammaQA.
- Scheduled to gain hands-on exposure to software development, live project workflows, technical training, and engineering practices.
- Program includes mentorship, project-based learning, interview preparation, and professional development focused on industry readiness.

Selected Projects

Zeno AI: Intelligent Multi-Modal Assistant

React, Vite, Firebase, OpenRouter API, Render

- Built a multimodal AI assistant supporting real-time web intelligence and vision analysis with secure Firebase authentication.
- Implemented dynamic model routing between Gemini 2.5 Flash and Perplexity with automated fallback handling for resilient AI responses.

Agentic AI-Based Tournament Management System

Hebbale Academy Hackathon, Nov 11–13, 2025

- Developed an AI-powered tournament management platform using an agentic architecture to automate registration, scheduling, and match coordination.
- Built backend APIs, database integration, and user-facing workflows, completing the core features within a 3-day hackathon.

Learning Management System (LMS)

React.js, Next.js, Tailwind CSS, Firebase

- Developed a full-stack Learning Management System with authentication, course management, student dashboards, and progress tracking.
- Built responsive web interfaces and persistent student progress functionality using React, Next.js, Tailwind CSS, and Firebase.

Ollama Local Chatbot

Python, Streamlit, Ollama

- Developed a privacy-focused local AI chatbot running directly on Ollama models without relying on cloud APIs.

- Integrated live web search and a lightweight Streamlit interface for local AI conversations and real-time information retrieval.

Krishna Leela Chatbot

JavaScript, HTML/CSS, Google Gemini API

- Built a multilingual AI storytelling chatbot powered by Google Gemini API for interactive cultural and narrative conversations.
- Designed a lightweight responsive frontend using HTML, CSS, and Vanilla JavaScript for desktop and mobile users.

Research & Publications

Tournament Management Agent Using Agentic Artificial Intelligence *International Journal of Creative Research Thoughts (IJCRT), Dec 2025*

- Published research paper in the International Journal of Creative Research Thoughts (IJCRT), Volume 13, Issue 12, December 2025, pp. g967–g975.
- Proposed an AI-powered Tournament Management Agent integrating FastAPI, SQLite, and Google Gemini for natural language-driven tournament operations.
- Designed an agentic system supporting tournament creation, updating, deletion, retrieval, and workflow automation through conversational interaction.
- **Paper ID:** IJCRT2512785 — [Publication Page](#) — [PDF](#)

Published Author, Amazon KDP

2 Independently Published Books

- *Reclaim Your Focus: A Guide to Dopamine Detox and Get Things Done* (Productivity & Psychology) [Amazon]
- *The Two-Speed Mind: Solving the 90s vs. 2000s Conflict to End Your Structural Stress* (Cognitive Science & Modern Workflows) [Amazon]
- Independently managed research, writing, editing, formatting, publishing, and promotion for both books.

Hackathons & Achievements

SIH Internal Hackathon 2025

MIT Mysore, Sep 26–27, 2025, Team CodeNova

- Developed Lexsent, a deep learning-based sentiment analysis system for comments from the E-Counselling Module during a 2-day internal hackathon.
- Proposed a RoBERTa-BiLSTM-Attention architecture for sentiment and emotion analysis with dashboards and policy-oriented insights.

ERP-Based Integrated Student Management System

INNOVATHON 2026, SJBIT, Mar 26–27, 2026

- Developed an ERP-based prototype to streamline admission, student data, attendance, academic performance, and institutional communication during a 2-day hackathon.
- Built and presented the solution with Team Eclipse Engine under competitive time constraints.

AI-Based Customer Risk Intelligence System

Dayananda Sagar College of Engineering, Apr 28–29, 2026

- Developed an AI-based customer risk intelligence system for fraud detection and customer churn prediction during a 48-hour hackathon.
- Applied machine learning techniques to identify anomalous transaction patterns and analyze customer behavior for proactive churn prediction.

AITRONIX 2025, Theft Alert Notification using ESP8266

MIT Mysore, May 24, 2025

- Presented a theft alert notification system using ESP8266 at the AITRONIX 2025 final expo under the theme “Dive Into Embedded Intelligence.”
- Gained hands-on experience with ESP8266, IoT-based systems, and embedded intelligence through team-based development.

Certifications & Training

- **Infosys Springboard:** Latest Developments in Cloud, AI/ML, and Generative AI; Applying Machine Learning; Getting Started with Large Language Model Operations (LLMOps).
- **IBM SkillsBuild:** Artificial Intelligence Fundamentals.
- **Google / Coursera:** Connect and Protect: Networks and Network Security.
- **IBM / Coursera:** Statistics for Data Science with Python.
- **Hebbale Academy, MIT Mysore:** One-Day Workshop “Dive Into Agentic AI”, May 28, 2025.
