

KUNDAN D R

☎ +91 7019934034 — ✉ kundandr05@gmail.com — 🔗 LinkedIn — 🐙 GitHub

Professional Summary

AI & Machine Learning Engineering student with hands-on experience building Agentic AI systems, multimodal assistants, and full-stack applications using Python, FastAPI, React, and Next.js. Published research author with an IJCRT publication and two independently published Amazon KDP books. Experienced in LLM integration, REST APIs, database development, rapid prototyping, and hackathon-based software development. Incoming incubation intern at WizzyBox.

Education

Maharaja Institute of Technology, Mysuru <i>Bachelor of Engineering – Computer Science and Engineering (AI & ML)</i>	2023 – 2027
Sri Adichunchanagiri Independent PU College <i>Pre-University Course – PCMB</i>	2021 – 2023
BGS Central School, Bhadravathi <i>Secondary School Leaving Certificate (SSLC)</i>	2021

Projects

Zeno AI: Intelligent Multi-Modal Assistant – Built a multimodal AI assistant supporting real-time web intelligence and vision analysis with secure Firebase authentication. – Implemented dynamic model routing between Gemini 2.5 Flash and Perplexity with automated fallback handling for resilient AI responses.	<i>React, Vite, Firebase, OpenRouter API</i>
Agentic AI-Based Tournament Management System – Developed an AI-powered tournament management platform using agentic architecture to automate registration, scheduling, and match coordination. – Built backend APIs, database integration, and user-facing workflows, completing core features within a 3-day hackathon.	<i>Python, FastAPI, SQLite, LLMs</i>
Learning Management System (LMS) – Developed a full-stack Learning Management System with authentication, course management, student dashboards, and progress tracking. – Built responsive interfaces and persistent student progress functionality using React, Next.js, Tailwind CSS, and Firebase.	<i>React.js, Next.js, Tailwind CSS, Firebase</i>
Ollama Local Chatbot – Developed a privacy-focused local AI chatbot running directly on Ollama models without relying on cloud APIs. – Integrated live web search and a lightweight Streamlit interface for local AI conversations and real-time information retrieval.	<i>Python, Streamlit, Ollama</i>
Krishna Leela Chatbot – Built a multilingual AI storytelling chatbot powered by Google Gemini API for interactive cultural and narrative conversations. – Designed a lightweight responsive frontend using HTML, CSS, and Vanilla JavaScript for desktop and mobile users.	<i>JavaScript, HTML/CSS, Google Gemini API</i>

Technical Skills

- **Programming:** Python, JavaScript, TypeScript, Java, C, HTML, CSS
- **Artificial Intelligence:** Agentic AI, Multi-Agent Systems, Machine Learning, Deep Learning, LLM Integration, RAG, Prompt Engineering, Sentiment Analysis
- **LLM Technologies:** Gemini, OpenAI, Perplexity, OpenRouter API, Ollama
- **Web Development:** React.js, Next.js, Node.js, Tailwind CSS, Streamlit, Responsive Web Development
- **Backend:** FastAPI, REST APIs, API Integration, Backend Architecture
- **Databases:** SQL, SQLite, SQLite Cloud, Firebase
- **Cloud / Deployment:** Firebase Authentication, AWS Foundations, Microsoft Azure Basics, Render, Vercel
- **Tools:** Git, GitHub
- **Soft Skills:** Communication, Team Collaboration, Problem Solving, Time Management

Research & Publications

Tournament Management Agent Using Agentic Artificial Intelligence <i>Thoughts (IJCRT), Dec 2025</i> – Published research paper in the International Journal of Creative Research Thoughts (IJCRT), Volume 13, Issue 12, December 2025, pp. g967–g975. – Proposed an AI-powered Tournament Management Agent integrating FastAPI, SQLite, and Google Gemini for natural language-driven tournament operations. – Designed an agentic system supporting tournament creation, updating, deletion, retrieval, and workflow automation through conversational interaction. – Paper ID: IJCRT2512785 — Publication Page — PDF	<i>International Journal of Creative Research Thoughts (IJCRT)</i>

Hackathons & Competitions

SIH Internal Hackathon 2025

MIT Mysore, Sep 26–27, 2025

- Developed Lexsent, a deep learning-based sentiment analysis system for comments from the E-Counselling Module during a 2-day internal hackathon.
- Proposed a RoBERTa-BiLSTM-Attention architecture for sentiment and emotion analysis with dashboards and policy-oriented insights.

INNOVATHON 2026 – ERP-Based Integrated Student Management System

SJBIT, Mar 26–27, 2026

- Developed an ERP-based prototype to streamline admission, student data, attendance, academic performance, and institutional communication during a 2-day hackathon.
- Built and presented the solution with Team Eclipse Engine under competitive time constraints.

AI-Based Customer Risk Intelligence System

Dayananda Sagar College of Engineering, Apr 28–29, 2026

- Developed an AI-based customer risk intelligence system for fraud detection and customer churn prediction during a 48-hour hackathon.
- Applied machine learning techniques to identify anomalous transaction patterns and analyze customer behavior for proactive churn prediction.

AITRONIX 2025 – Theft Alert Notification using ESP8266

MIT Mysore, May 24, 2025

- Presented a theft alert notification system using ESP8266 at the AITRONIX 2025 final expo under the theme “Dive Into Embedded Intelligence.”
- Gained hands-on experience with ESP8266, IoT-based systems, and embedded intelligence through team-based development.

Certifications

- **Infosys Springboard:** Latest Developments in Cloud, AI/ML, Applying Machine Learning and Generative AI
- **IBM SkillsBuild:** Artificial Intelligence Fundamentals
- **IBM / Coursera:** Statistics for Data Science with Python
- **Google / Coursera:** Connect and Protect: Networks and Network Security
