

KUNDAN D R

AI & Machine Learning Engineering Student

📍 Mysuru, Karnataka, India — 📞 +91 7019934034 — ✉ kundandr05@gmail.com
🌐 Portfolio — 🔗 LinkedIn — 🐙 GitHub

Professional Summary

Results-driven AI & Machine Learning engineering student with hands-on experience building intelligent AI assistants, multi-agent systems, and scalable backend applications using Python, FastAPI, React, and Next.js. Published IJCRT researcher and author of two Amazon KDP books with a strong interest in Generative AI, backend engineering, and production-ready software.

Education

Maharaja Institute of Technology, Mysuru <i>Bachelor of Engineering (B.E.) in Computer Science & Engineering (AI & ML)</i>	Expected Graduation: 2027 Mysuru, Karnataka
Sri Adichunchanagiri Independent PU College <i>Pre-University Course (PCMB)</i>	2023 Karnataka
BGS Central School, Bhadravathi <i>Secondary School Leaving Certificate (SSLC)</i>	2021 Karnataka

Technical Skills

Programming	Python, JavaScript, TypeScript, Java, C, HTML/CSS
AI & ML	Agentic AI, Multi-Agent Systems, LLMs (Gemini, Perplexity, OpenAI), OpenRouter API, RAG, Prompt Engineering
Frameworks	FastAPI, React.js, Next.js, Node.js, Tailwind CSS
Databases	SQL, SQLite, SQLite Cloud
Cloud & Deployment	Firebase Authentication, AWS (Foundations), Microsoft Azure (Basics), Render, Vercel
Tools	Git, GitHub, REST APIs, System Architecture, Problem Solving

Selected Projects

Zeno AI: Intelligent Multi-Modal Assistant	<i>React, Vite, Firebase, OpenRouter API, Render</i>
– Developed a production-ready multimodal AI assistant using React, Firebase, and OpenRouter APIs. – Implemented intelligent model routing between Gemini 2.5 Flash and Perplexity for vision analysis and real-time web search. – Integrated secure authentication and automatic API fallback mechanisms for reliable AI responses.	
Agentic AI-Based Tournament Management System	<i>Python, FastAPI, SQLite, LLMs</i>
– Developed an AI-powered management platform to automate tournament registration, scheduling, and match coordination. – Designed a multi-agent architecture enabling intelligent decision-making and seamless workflow automation. – Built a high-performance FastAPI backend with SQLite and integrated a natural language query assistant.	
Learning Management System (LMS)	<i>React.js, Next.js, Tailwind CSS, Firebase</i>
– Developed a full-stack Learning Management System supporting authentication, course management, and progress tracking. – Designed responsive student dashboards with secure login, persistent progress saving, and intuitive navigation. – Implemented secure authentication and responsive dashboards using React, Next.js, Tailwind CSS, and Firebase.	
Ollama Local Chatbot	<i>Python, Streamlit, Ollama</i>
– Developed a privacy-focused local AI chatbot running directly on Ollama models without relying on cloud APIs. – Integrated live web search capabilities allowing the local LLM to retrieve and synthesize real-time information. – Built an interactive Streamlit interface for fast and lightweight AI conversations.	
Krishna Leela Chatbot	<i>Vanilla JavaScript, HTML/CSS, Google Gemini API</i>
– Built a multilingual AI storytelling chatbot powered by Google Gemini API for interactive cultural narratives. – Designed a lightweight responsive frontend using HTML, CSS, and Vanilla JavaScript without external frameworks. – Optimized performance for smooth AI-assisted storytelling across desktop and mobile devices.	
ERP-Based Student Management System	<i>Innovathon 2026 – SJBIT</i>
– Developed an ERP solution to streamline student, faculty, and administrative workflows during Innovathon 2026. – Designed database modules for attendance management, student records, and academic performance tracking. – Delivered a functional ERP prototype within hackathon timelines using collaborative agile development.	

Research & Publications

Tournament Management Agent Using Agentic Artificial Intelligence

IJCRT, 2025

- Published a peer-reviewed research paper in the International Journal of Creative Research and Development (IJCRT).
- Presented the architecture, implementation, and efficiency of multi-agent AI systems for intelligent tournament automation.
- Focused on workflow optimization, scheduling, and intelligent coordination using Agentic AI.

Published Author – Amazon KDP

Books

- *Reclaim Your Focus: A Guide to Dopamine Detox and Get Things Done* (Productivity & Psychology).
- *The Two-Speed Mind: Solving the 90s vs. 2000s Conflict to End Your Structural Stress* (Cognitive Science & Modern Workflows).
- Independently managed the complete lifecycle of research, writing, editing, formatting, publishing, and promotion.

Certifications

- **Infosys Springboard** – Cloud Computing, Artificial Intelligence, Machine Learning, and Generative AI.

Languages

- English – Fluent
- Kannada – Native
